LECTURE 2 – INTRODUCTION: SETTING THE SCENE, STRATEGY, PERFORMANCE

Mihkel Lauk

ITE4230 - Public Sector Service Design and Implementation
Tallinn University of Technology

14.04.2026

AGENDA

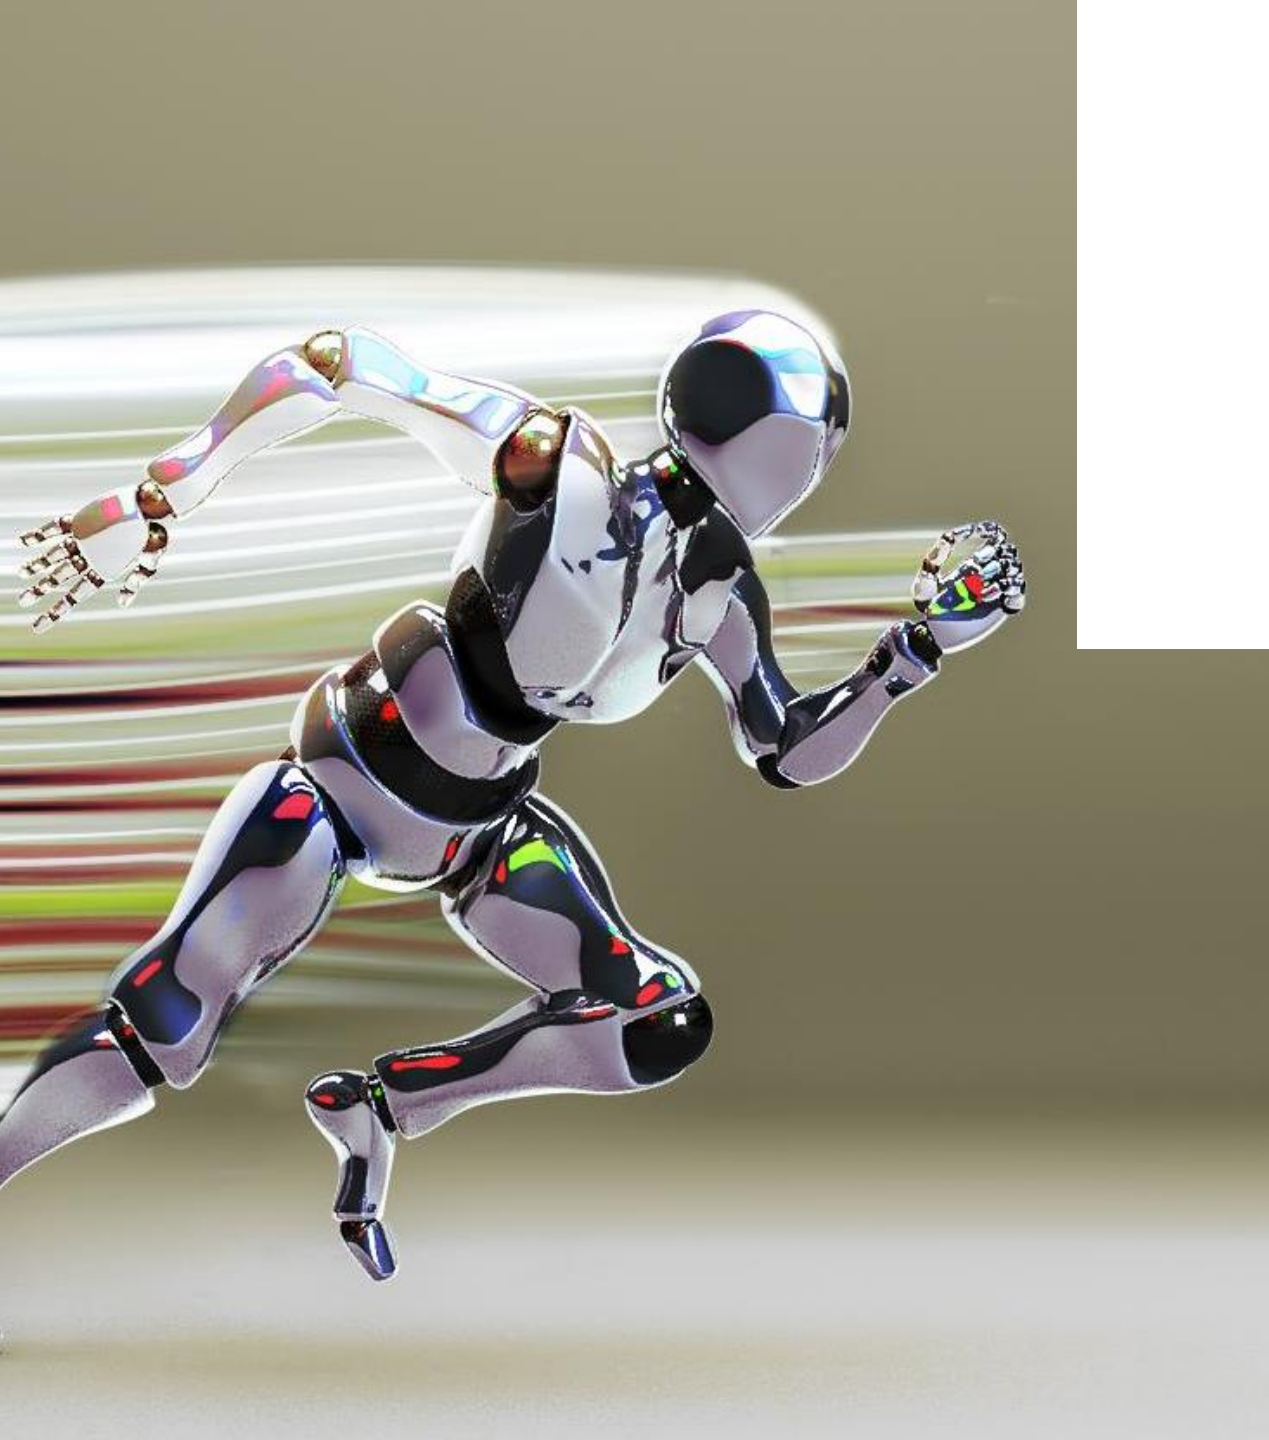

- E-governance maturity
- Homework introduction: country review
- The current state of e-governance
- Setting the scene – scope of the change
- Regulative influencers relevant to change
- Strategy alignment
- Impact assessment framework

IMPORTANT: USE OF TALTECH EMAILS

- All official communication and integration goes through the official TalTech accounts.
 - OIS
 - Moodle
 - Teams
- Please do not use any other email addresses for logging in or communicating. Otherwise, you may miss important information.

INTRODUCTION TO THE COURSE: LECTURE TYPES

- Friday 05.09 – hybrid
- Friday 19.09 – online only
- Friday 03.10 – online only + Guest Lecturer, Performance Budgeting
- Wednesday 05.11 – hybrid + Guest Lecturer, Neuro UX
- Friday 07.11 - hybrid

DISCUSSION

WHAT IS E-GOVERNANCE?

WHAT IS E-GOVERNMENT?

WHY ARE THEY IMPORTANT?

14.04.2026

DEFINITIONS

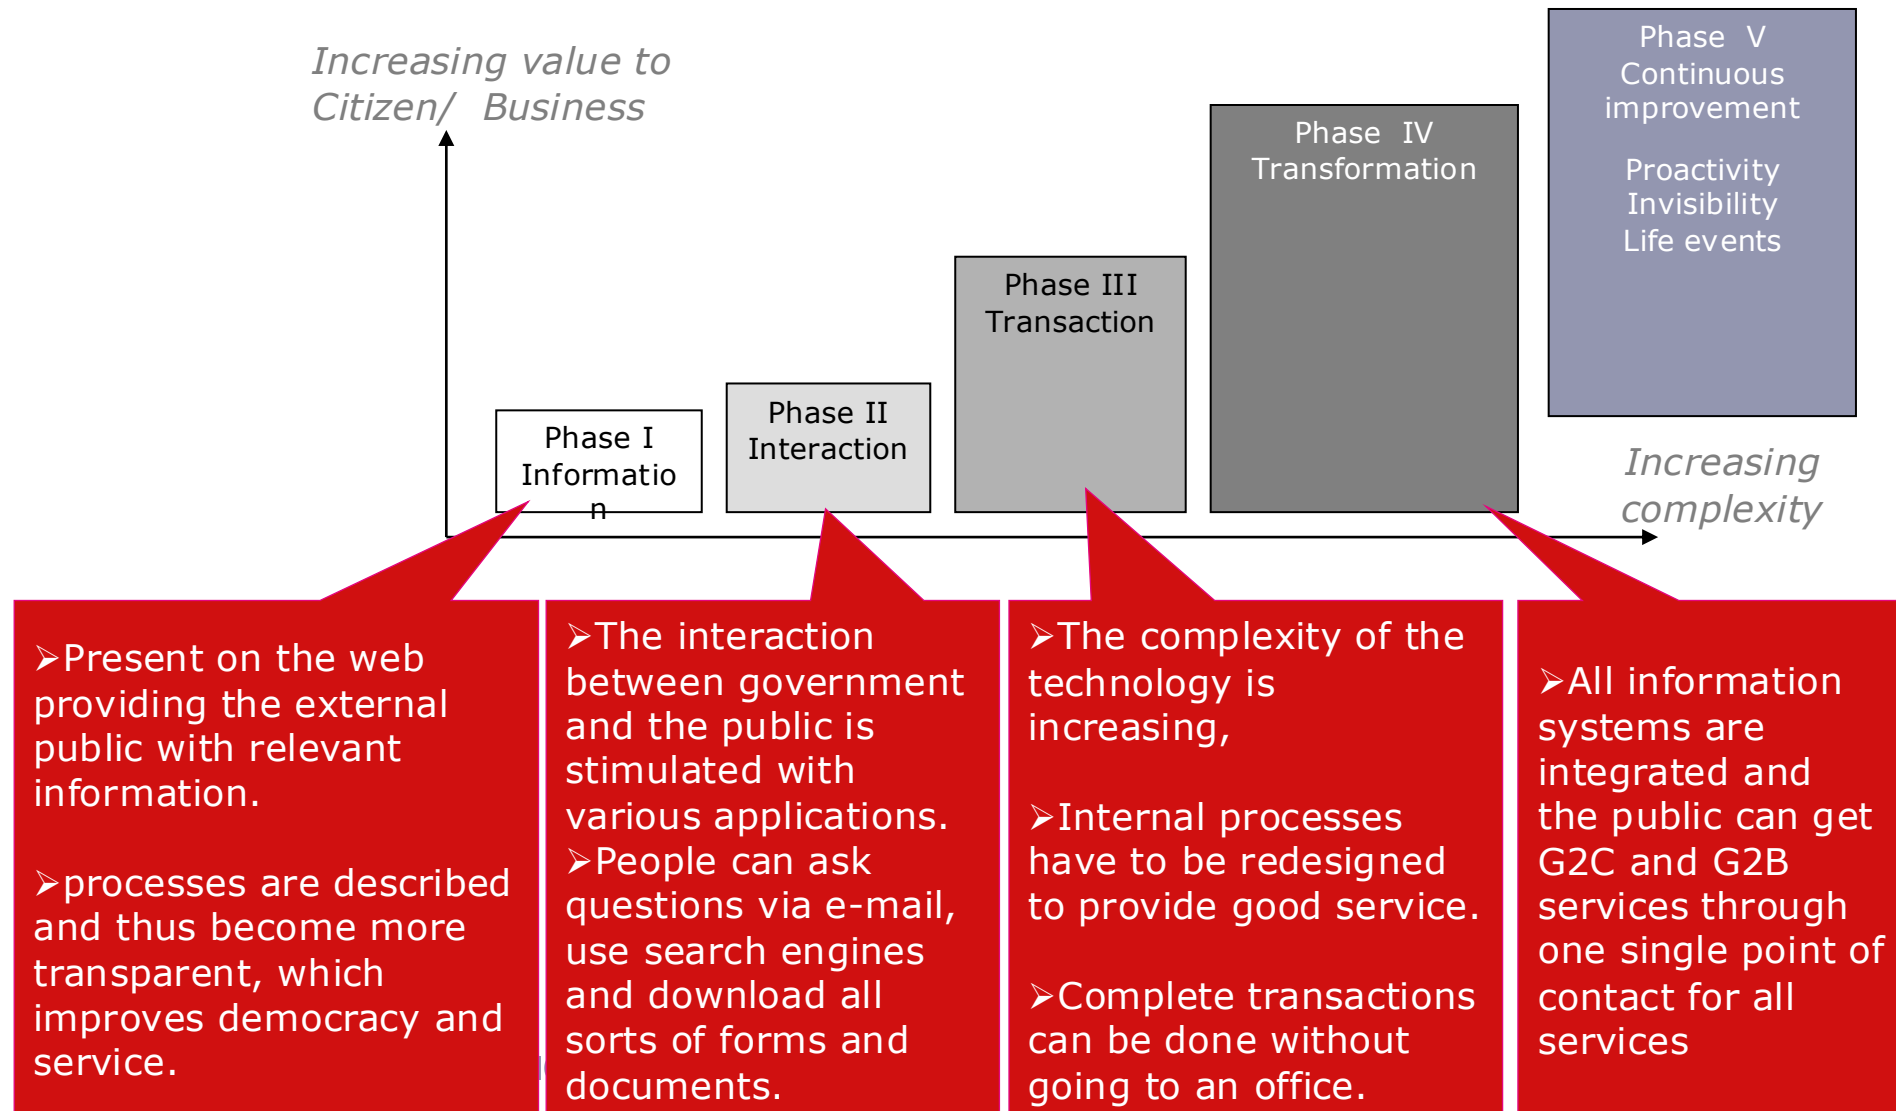

- **e-government**

- the use of ICT, and particularly internet, as a tool to achieve better government (OECD).
- a government that applies ICTs to transform its internal and external relationships (UN).
- the use of ICTs in public administrations combined with organisational change and new skills in order to improve public services and democratic processes and strengthen support for public policies (EC).

- **e-governance**

- Expressing (ruling, policy making) efficient e-Government, outside public administration boundaries, allowing the full-participation of civil society as active stakeholders.
- It is not only something that enhances service delivery, but also facilitates and enhances interactions between actors, thus enabling changes in policy-making and regulatory processes.

EVOLUTION OF E-GOVERNANCE MATURITY

E-GOVERNANCE MATURITY ASSESSMENT COMPONENTS

- Political will and support
- Coordination
- Financing model
- Legal framework
- Digital databases, interoperability, secure data exchange
- Secure digital identity, digital signature
- Access to services, awareness-raising
- E-participation, e-democracy
- Information security
- Telecommunications and digital infrastructure
- International cooperation

Moodle: Digital Maturity Assessment Questionnaire (use for homework 1)

HOMEWORK IN GROUPS: COUNTRY REVIEW

- Prepare a presentation:
 - 1) Choose a country & publish in Teams
 - 2) Form a team (in Teams chat)
 - 3) General brief about e-governance maturity
 - 4) Outstanding examples of developments / Lessons to learn
 - 5) Be prepared to present it for max 10 minutes presentation time
 - 6) Presentation on 03.10.2025.
 - 7) Format Powerpoint PPT
 - 8) Use the template from Estonian e-Governance Academy

THE CURRENT STATE OF THE **E-GOVERNANCE**

14.04.2026

INDICATORS OF THE LEVEL OF CAPABILITY OF THE DIGITAL STATE

- Ministry of Economic Affairs and Communication has performed the analysis of the digital state based on the data for 2021 and in comparison, with the years of 2022-2023. The important excerpts are:
- The number of development projects is growing every year, and the digital state is becoming more and more expensive. The need for financing the digital state will increase from 387 million euros to 469 million euros in 2022-2023 (+82 million, **+20% year-on-year**).
- The share of IT expenditures in the **state budget** was **2.8%** and **3.12%**, respectively.
- The share of IT costs in **GDP** is **1.09%** and **1.26%**, respectively.
- The share of **base funding** in IT costs is about **57%** and it is not transparent.
- The average **capacity** to implement **IT investments** in the areas of ministries was **75%** in 2021, while the average implementation of the **ICT budget** was **84%**.
- In the country, the share of IT **jobs filled** in 2021 averaged **89%**, with a total of **270 vacancies**.

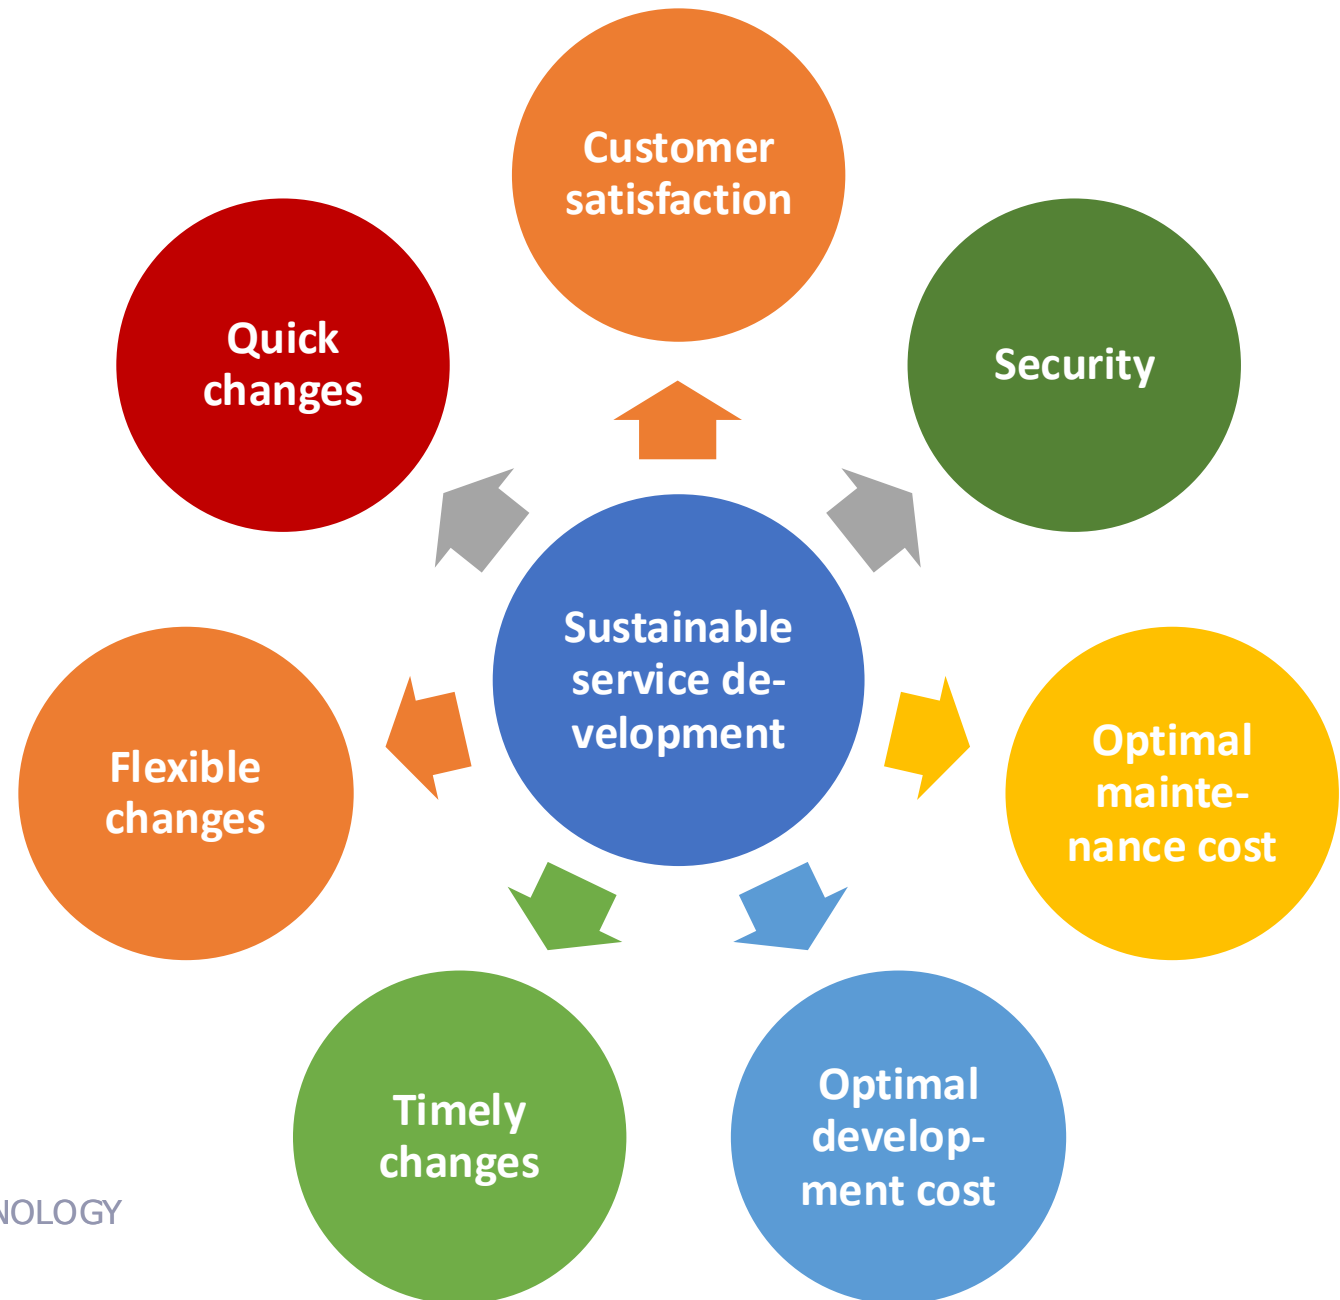

OPENING THE SCENE - SCOPE OF THE CHANGE

INTRODUCTION: TWO STORIES

- Story 1: How the Estonian government raised the age of eligibility for a child benefit.
- Story 2: How the Estonian government paid wage subsidies during the Covid pandemic.

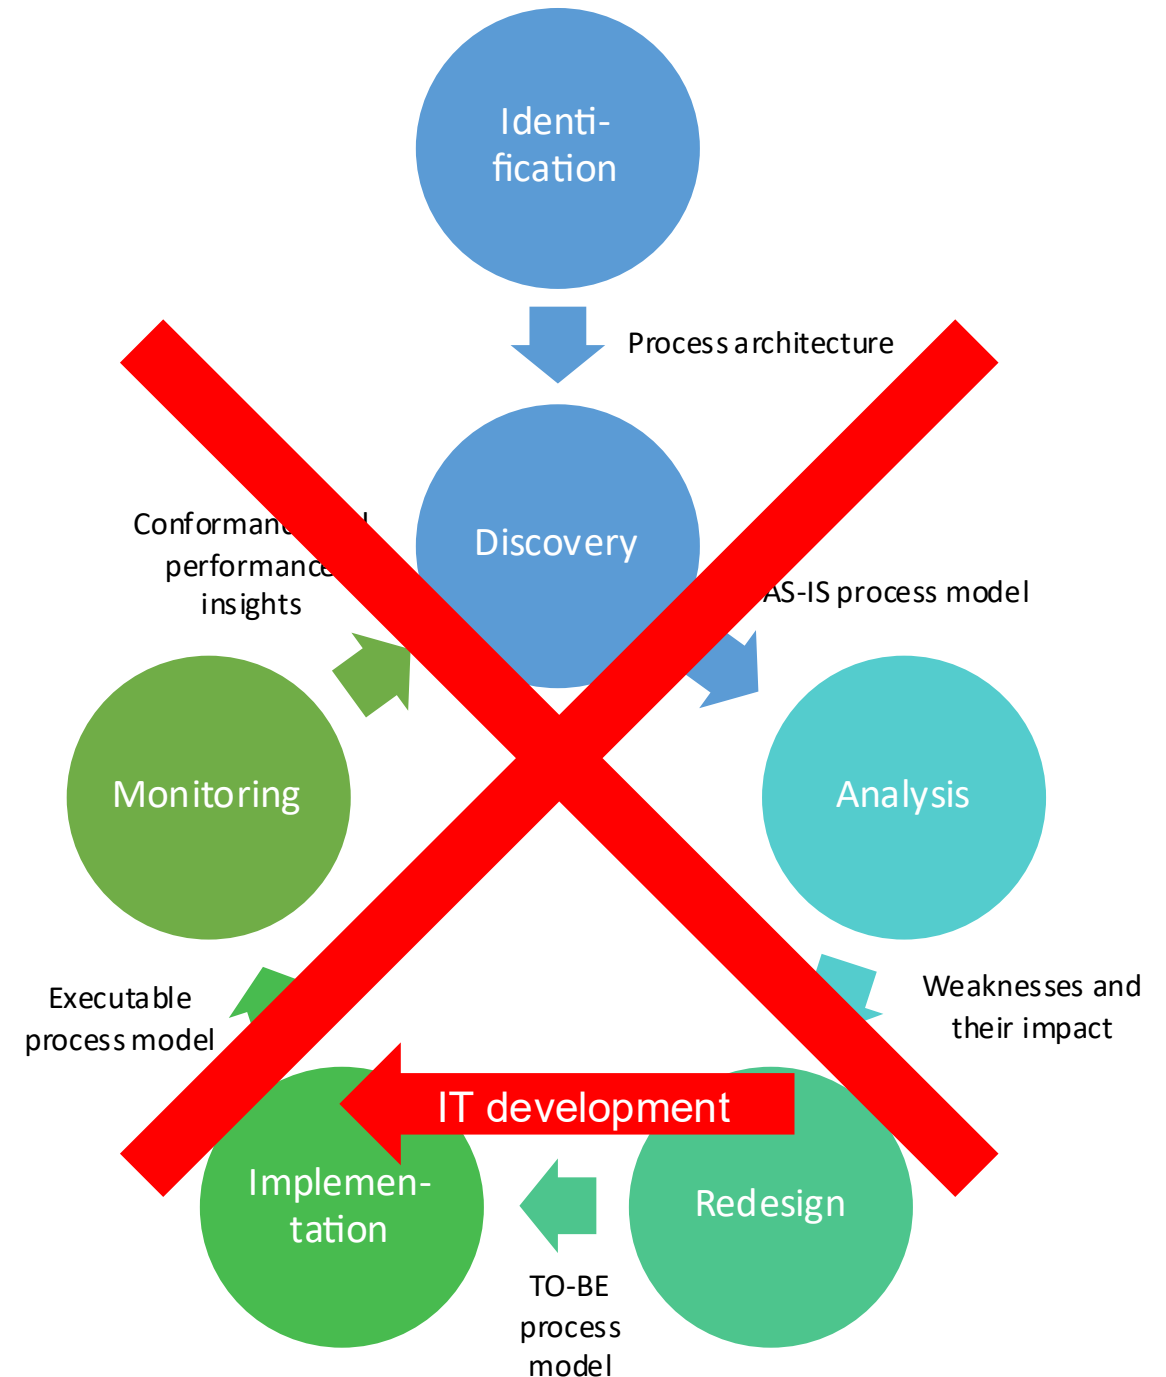

THE EXPECTED CHANGE

THE KEY ISSUE

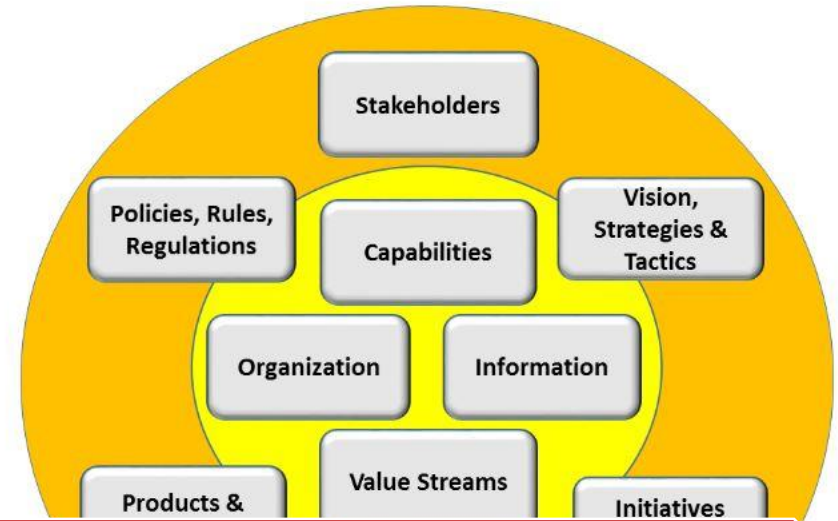

ROOT CAUSE FOR THE CHANGE

- The business side does not have sufficient control over the governance and management of the technology.

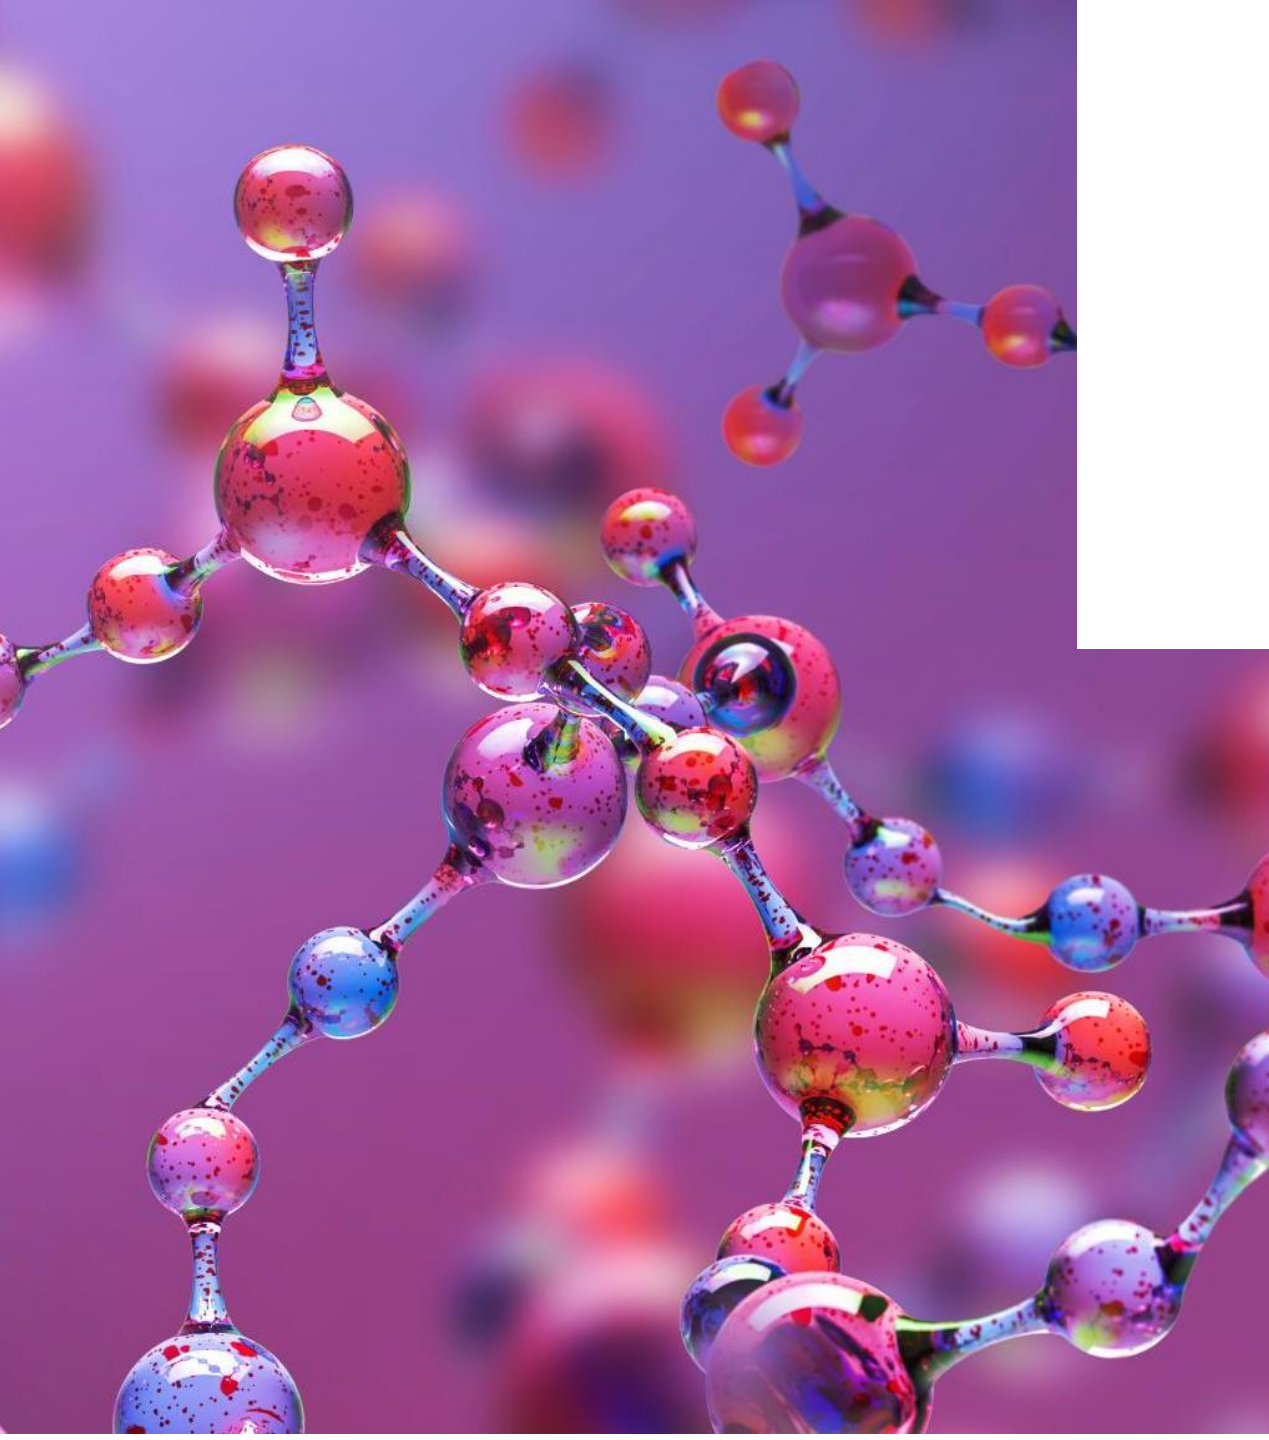

THE SOLUTION & THE CHALLENGE

- Increasing the capability of the business side to manage technology.
- Tool: business architecture.

REGULATIVE INFLUENCERS RELEVANT TO **CHANGE**

14.04.2026

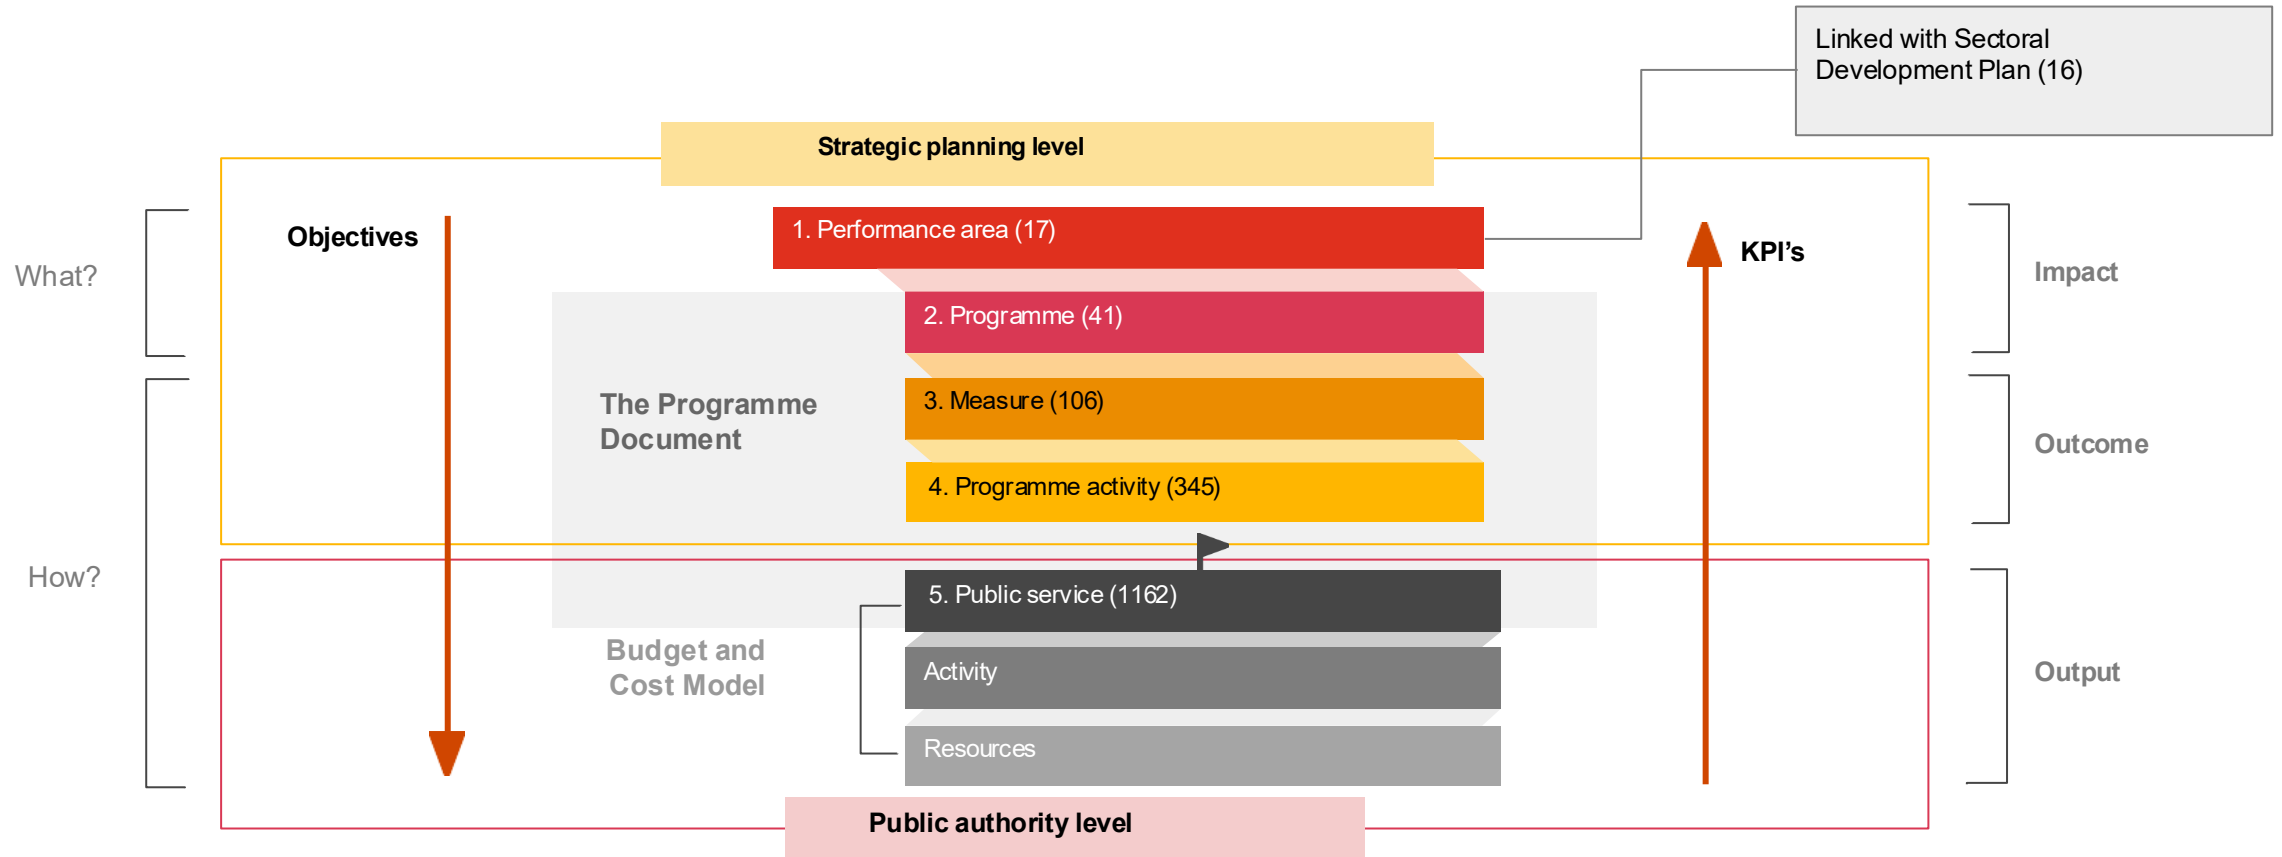

REGULATIVE INFLUENCERS RELEVANT TO CHANGE

- § 3 of the Cybersecurity Act (KüTS) imposes **obligations as a service provider** for, among other things, a government agency and a state agency administered by a government agency (the extension is valid from 16.08.2022).
- § 7 of the KüTS does **not allow to delegate responsibility**: if the service provider authorises the management of the system to another person or hosts the system with another person, the service provider is responsible for ensuring that the other person ensures the implementation of the security measures of the system.
- The **Estonian Information Security Standard Regulation** (E-ITS) is mandatory for all service providers (valid from 24.12.2022).
- As a first step, the E-ITS Application Guidelines **obliges to inventory the business processes** of the institution, which is one of the basic sub-views of business architecture.
- The Estonian Information Security Standard ensures **comprehensive protection of business processes** and information systems used for the performance of public duties.
- § 4 and 7 of the Principles for Managing Services and Governing Information (TKTA) define **public service and processes as management objects**.
- § 5 of the TKTA obliges the **development of services across the domain of a ministry** and assigns responsibility to the General Secretary: the comprehensive development of services in the area of government of the ministry is organized by the General Secretary of the Ministry or a person authorised by, based on the tasks of the area of government and the objectives set out in the relevant strategic development documents.
- § 6 of the TKTA defines the **value** created through the provision of a service and the satisfaction of the users of services as the management object.

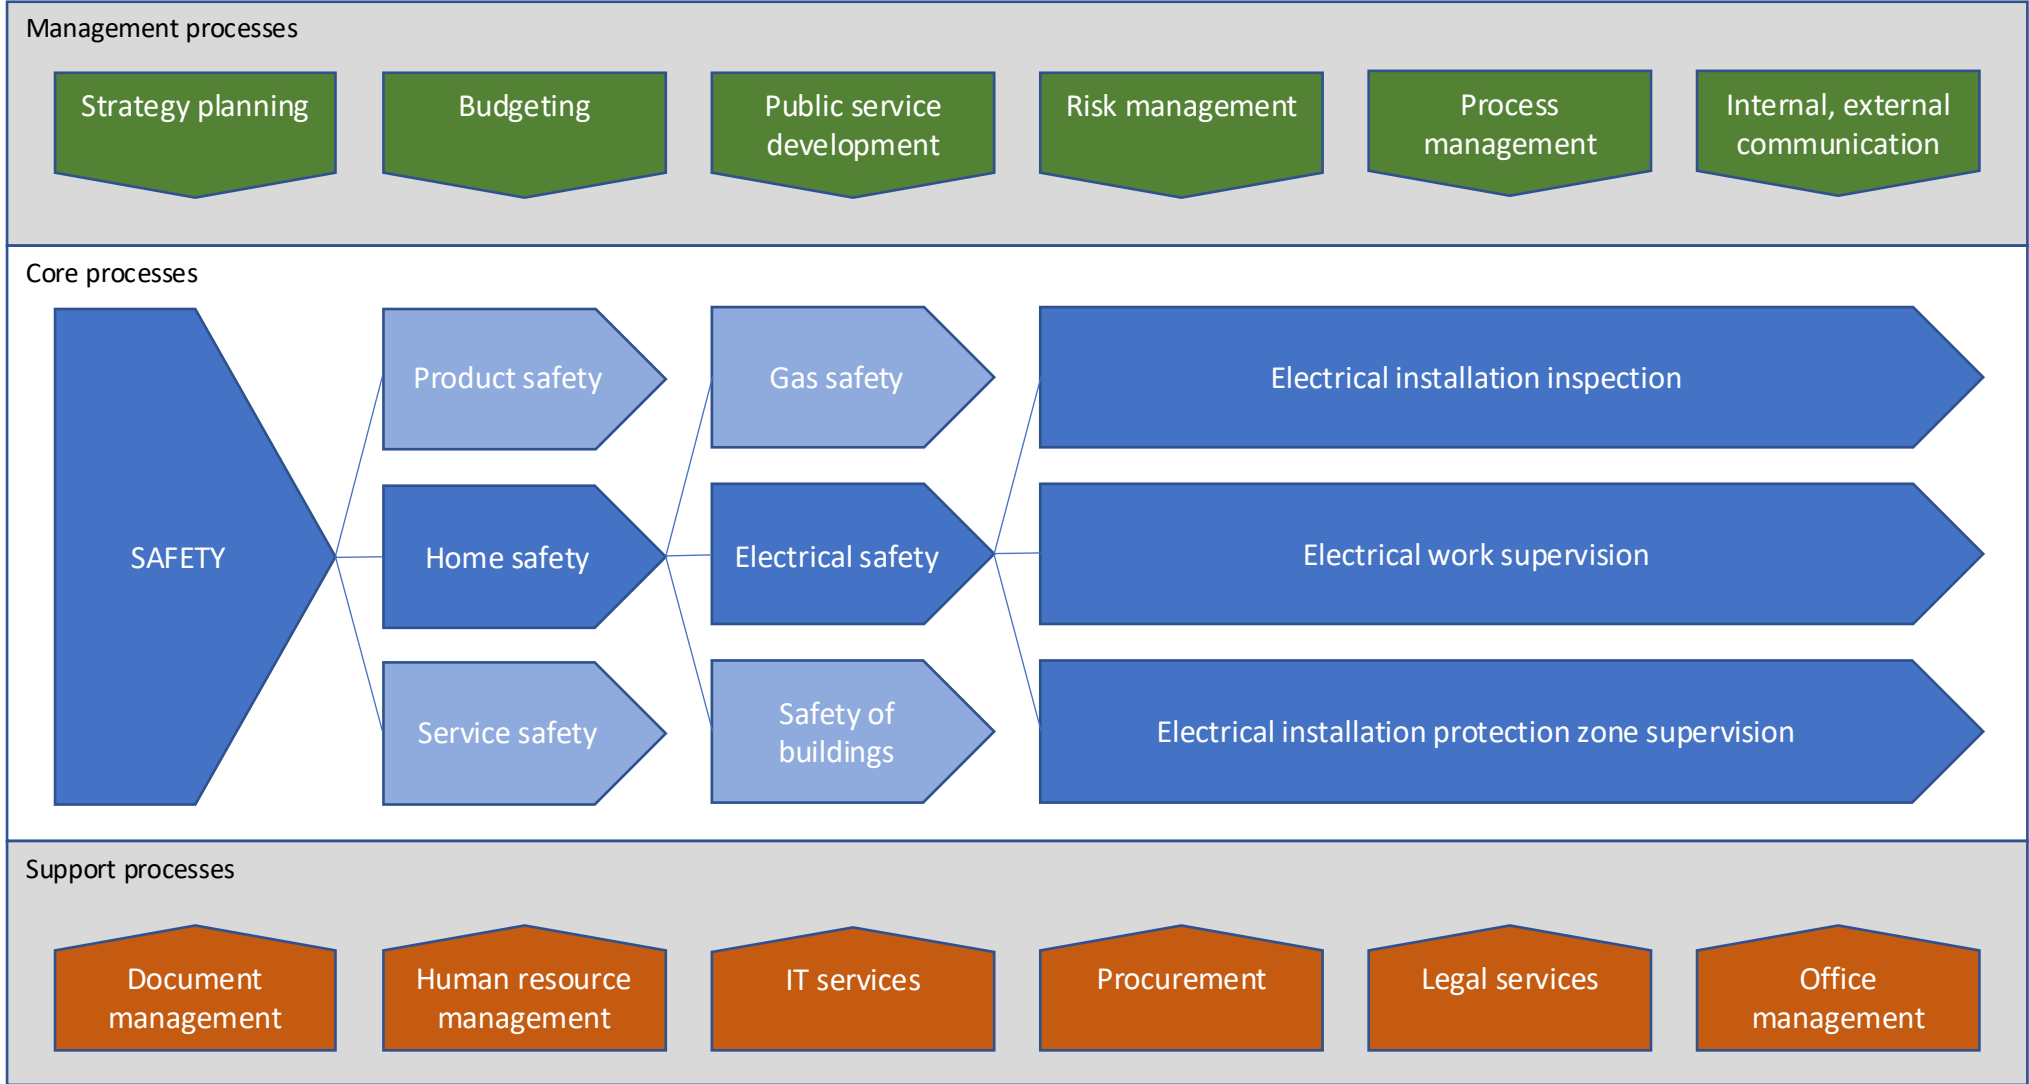

STRATEGY **ALIGNMENT**

STRATEGY ALIGNMENT WITH THE PUBLIC SERVICES
